**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3, 5 and 28, drawn to a method for ordering print images, classified in class 705, subclass 26.
  - II. Claims 6-10 and 29, drawn to input means, classified in class 345, subclass 156.
  - III. Claim 11, drawn to indicating available services, classified in class 705, subclass 14.
  - IV. Claim 12, drawn to displaying an order screen, classified in class 715, subclass 760.
  - V. Claims 13-15, 17, 28 and 30 drawn to displaying data stored on a computer readable medium, classified in class 369, subclass 47.1.
  - VI. Claims 19-21, 23, 24 and 31 drawn to a computer, classified in class 708, subclass 134.
  - VII. Claim 25 drawn to a server, classified in class 709, subclass 223.
  - VIII. Claims 26 and 32 drawn to a computer program, classified in class 719, subclass 312.

IX. Claims 27 and 33, drawn to a computer readable medium, classified in class 711, subclass 115.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I-IX are related subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as ordering books over the internet. Invention II has separate utility such as a keyboard. Invention III has separate utility such as targeted advertisements. Invention IV has separate utility such as a webpage. Invention V has separate utility such as a storing a document on a computer readable medium. Invention VI has separate utility such as a dedicated terminal for buying stocks and bonds. Invention VII has separate utility such as a web server. Invention VIII has separate utility such as an operating system. Invention IX has separate utility such as flash memory.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

(a) the inventions have acquired a separate status in the art in view of their different classification;

(b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;

(c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);

(d) the prior art applicable to one invention would not likely be applicable to another invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the**

requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
